CENTRE BASEBALL

4 INTRASQUADS + 2 LINDSEY WILSON GAMES / OCT 08-24

2026

FALL / VOL. 05

FALL FIELDNOTES

SIX SESSIONS. MORE CONTEXT. BETTER QUESTIONS.

CENTRE PITCHES

1192

Opponent pitching kept separate

CENTRE ARMS / BATS

18 / 23

All six recorded sessions

CENTRE SCORED PA

302

Confirmed scoring; incomplete PAs omitted

CENTRE CONTACT COVERAGE

127 / 172

Usable launch / balls in play

01 / THE MOVEMENT FINGERPRINT

Same mound. *Different problems.*

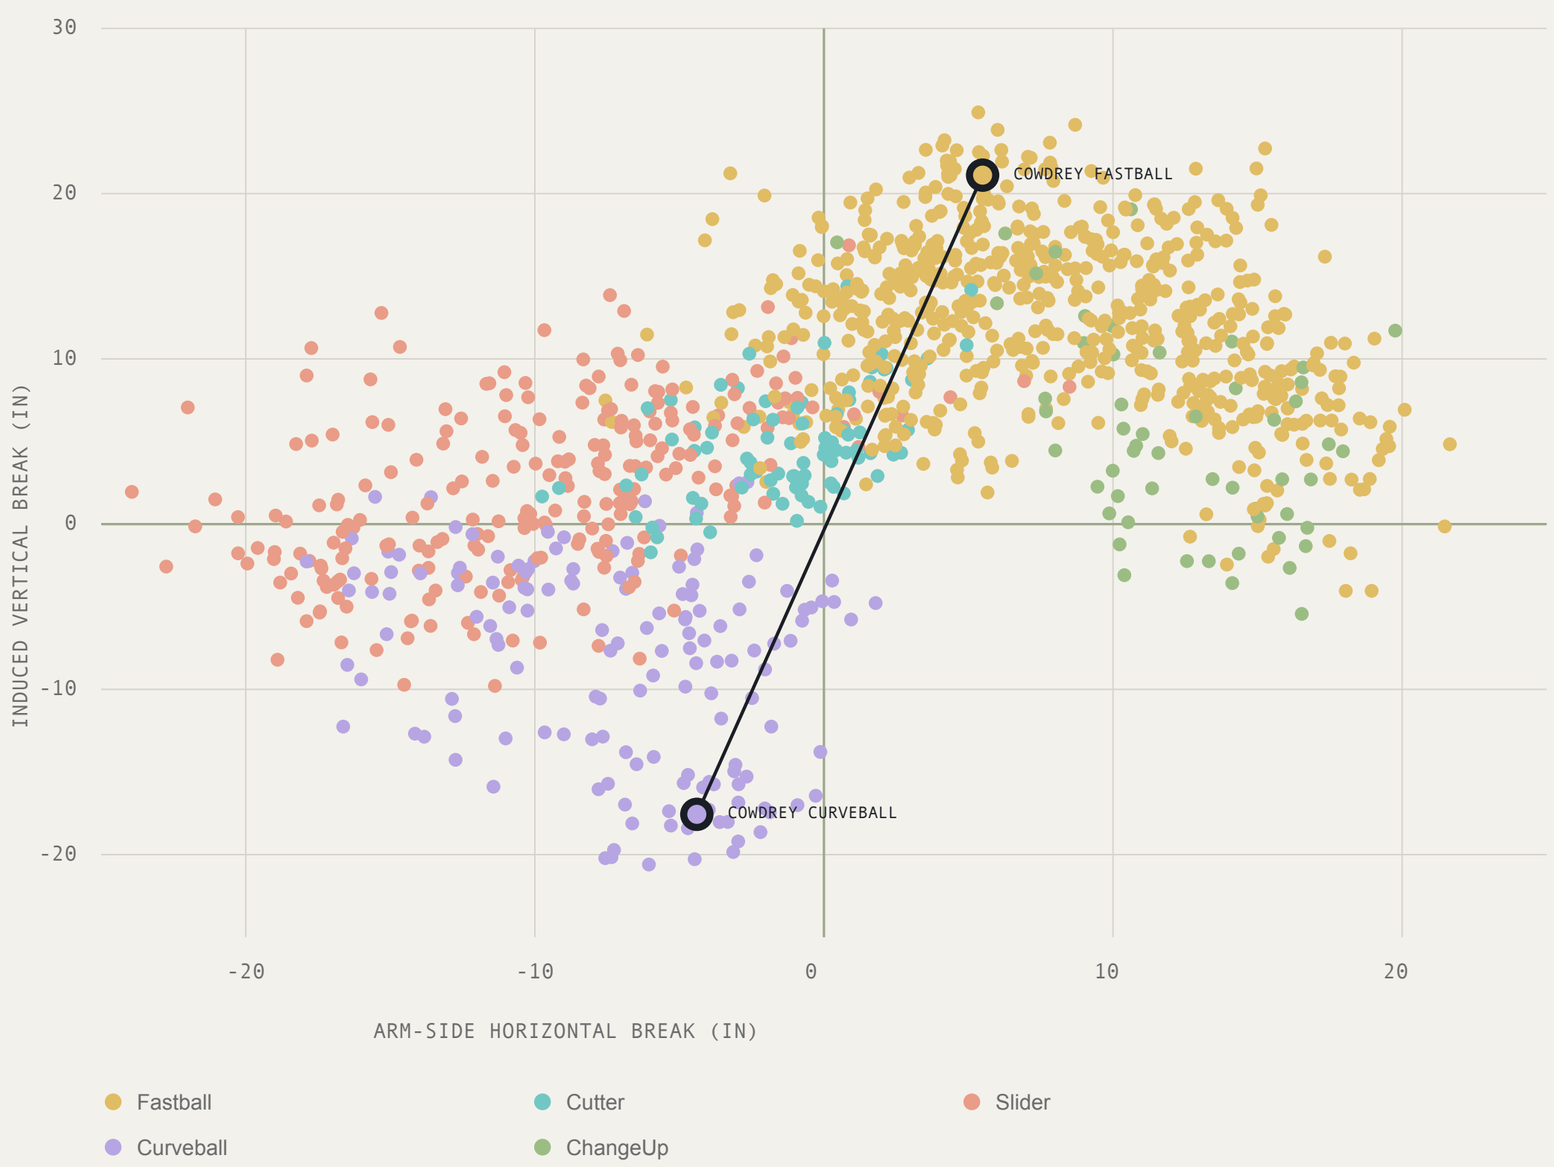

An arsenal is a set of shapes, not a top velocity. Each dot is one measured pitch. Movement is mirrored by throwing hand, so positive horizontal break is always arm-side.

39.9 inches

OF MOVEMENT SEPARATION

Harrison Cowdrey's curveball (30) and fastball (34) emerge from mean release points only 2.8 inches apart.

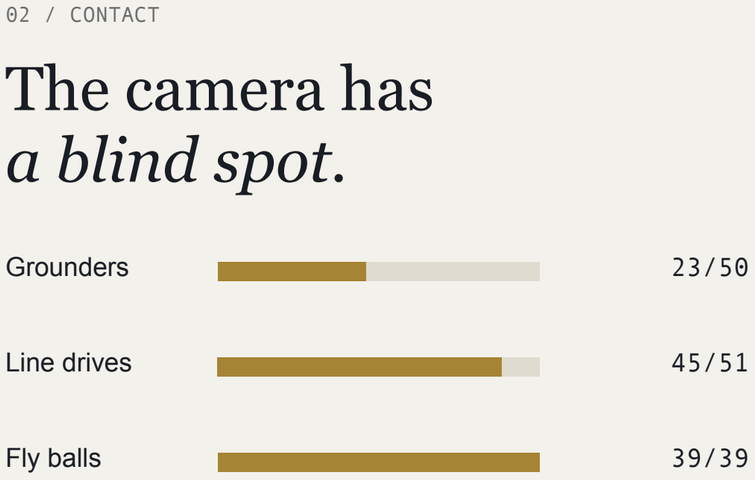

A pairing to test. Average release similarity does not establish tunneling or deception.

1191 measured shapes; 1 Centre pitch has no shape data.

02 / CONTACT

The camera has *a blind spot.*

Usable launch readings / balls in play. Missing data are not evenly distributed across contact types.

Evan Rygalski: 101.1 mph median (12/13 BIP).

COACHING QUESTION Does the video tell a different story than the tracked EV average?

03 / PITCH SELECTION

The count can *reveal the menu.*

Camden Stout

85%

11/13 behind*

22%

2/9 two strikes

Fastball usage. *Behind = balls > strikes, excluding two-strike counts. Descriptive mix, not proof of a tell.

COACHING QUESTION Can a secondary pitch earn a strike when the hitter expects hard stuff?

04 / INTRASQUAD DEFENSIVE SPACE

Alignment is *part of the plan.*

27.5 ft

Mason Dugan / 2B

Median lateral alignment: +55.7 ft vs LHH (n=28); +28.2 ft vs RHH (n=276). Positive is toward first base.

Four intrasquads only. No position exports were supplied for the Lindsey Wilson games.

COACHING QUESTION Does this match the plan for these hitters and counts?

82 ELIGIBLE PITCH TAGS CORRECTED

1524 SOURCE RECORDS REVIEWED

4 LIMITED-EVIDENCE LABELS

Centre performance throughout. Review counts cover both teams: 1,524 source records, 1,521 eligible pitches. Three missing-call records are excluded; one has no classifiable pitch evidence. Grade is evidence, not accuracy. Johnson LW 2 #317 confirmed as a single. Two flagged repeated endings retained. All decisions and limits are documented in the app.
